PREFACE

1994 ELK HUNTING AND HARVEST REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS	The number of hunters who hunted one or more days
HUNTER DAYS	Sum of whole days or portions of days hunted
PERCENT SUCCESS	The number of successful hunters divided by the total number of hunters and multiplied by 100
LOWER	Lower confidence limit at a level of confidence of 80 percent
POINT	The estimated value
UPPER	Upper confidence limit at a level of confidence of 80 percent
GEN ELK	An abbreviation for general elk license
GEN B10	An abbreviation for general elk license included in the nonresident B10 combination license
SP	An abbreviation for special permit
OTHER	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.
UNKWN	A symbol for unknown used to designate unknown sex

Explanations

The elk hunting and harvest statistics are estimates made from the sample of 58,044 questionnaires representing about 42 percent of all 138,567 elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

The analysis and report program was extensively modified last year to more accurately estimate and report special elk permit holders who hunted and/or harvested elk in hunting districts where their

(CONTINUED)

permit was not valid. These estimates are included in the "OTHER" categories for resident and nonresident for each hunting district. All licenses and permits which are valid in a particular hunting district are listed with the district and represent all hunting and harvest estimates for those license or permit holders that occurred within the district. The "OTHER" category gives all hunting and harvest activity that occurred in the hunting district by special permit holders whose permits were not valid in the district but may have hunted using their general elk license. It is important to keep in mind that the "GEN ELK" or "GEN B10" categories apply to those individual hunters who possessed only a general elk license and no special elk permit. This rationale is the same as used in previous years, except that hunting and harvest activity for special permit holders occurring where their special permit was not valid was reported at the end of previous years reports and gave only kill estimates.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. When the animal's age/sex is unknown or not reported the kill is listed under the "UNKWN" column. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively. All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1994 ELK TIME PERIOD OF KILL REPORT

MAY 25, 1995

PREFACE

1994 ELK TIME PERIOD OF KILL REPORT

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

UNKWN...............	A symbol for unknown used to designate unknown time period of kill
GEN ELK.............	An abbreviation for general elk license
GEN B10.............	An abbreviation for nonresident Big Game Combination license type B10
SP..................	An abbreviation for special permit preceding the special permit district/option designation
SPECIAL.............	Used in the regional or state summaries to designate combined special permits
OTHER...............	Hunting or harvest information relating to hunters who held a special elk permit valid only in other hunting districts. Some unexplained (illegal or invalid data) kills are also listed under the "OTHER" category.

Explanations

The elk time period of kill statistics are estimates made from the sample of 58,044 questionnaires representing about 42 percent of all 138,567 elk license holders. The total harvest estimate in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the total harvest estimate.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the various unknown categories given in the report. The "UNKWN" time period indicates elk kills with missing time period data. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

(CONTINUED)

This report for 1994 represents the fourth year that the time period of kill statistics have been expanded estimates rather than statistics based on the completed questionnaire sample. Reports previous to 1991 listed "SAMPLE NUMBER KILLED" above the right-hand column whereas this report lists "TOTAL HARVEST ESTIMATE".

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.

MONTANA DEPARTMENT OF FISH, WILDLIFE & PARKS

1994 ELK ANTLER STATISTICS

MAY 25, 1995

PREFACE

1994 ELK ANTLER STATISTICS

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from 199 subpopulations of resident and nonresident elk license or permit holders in our license database. One subpopulation consisted of all elk license holders who had purchased only a general elk license with no special elk permit, and the other 198 subpopulations were elk license holders who had drawn one of the 198 types of special elk permits. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

ANTLER TYPE...The number of points on each side
FREQUENCY.....The number of occurrences of the given antler type in the given hunting unit within the expanded sample antler data collected
PERCENT.......The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are estimates made from the sample of 58,044 questionnaires representing about 42 percent of all 138,567 elk license holders. The frequencies and percentages are expanded estimates made from the sample data collected for antlered elk. Total estimated number killed in each hunting unit is given at the bottom of the frequency column.

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 8. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

This report for 1994 represents the fourth year that the antler point frequencies have been expanded estimates rather than a frequency count of the collected sample data. This was done primarily to correct the occasional bias explained in the 1990 antler point statistics preface, but the change should also make the results easier to use.

Several hunting districts from regions three and four were combined beginning in 1992 to create region eight. Due to the creation of region eight, hunting and harvest trend data for regions three and four are not comparable between years before and after the creation of region eight.
